SET UP YOUR CONFERENCE

Businesses and businessmen always have need to setup conferences. However, there is always a constraint in the ability to get all participants together to have the conference in one location. Therefore there is a need to have a business tool that will permit the participants to call into a conference bridge facility to carry out the conference as if they are in one conference room from wherever they may be. A conference bridge facility provided by Alpha Technologies Limited permits up to 50 participants from different networks, local or international, to call into a SMAT number and participate in a conference. All local networks in Nigeria have the capability to setup on-net conference. This means that only subscribers of that network can participate in that conference.

Alpha Technologies has many types of conference facilities. One of them allows for anybody to originate and setup a conference. This is what we call a general conference. A conference number **070070707070** is dedicated for this purpose. To proceed, follow these steps;

Choose any preferable unique conference ID number and PIN

number. (For example, conference ID number is 111 and PIN

number is 123).

The conference originator will notify all prospective participants of the date and time for the conference before time.

Distribute the chosen conference ID number and PIN number to the participants.

On the appointed date and time, participants will dial

070070707070

There will be a voice prompt. Follow the voice prompt.
Enter the conference ID number followed by the # key.
Enter the PIN number followed by the # key.
Enter the conference.

Note that in a general conference of this nature all participants should ensure that they have sufficient credits on their phones before the conference or else they will fall out of the conference. If this happens they can rejoin the conference after recharging their phones by following the same steps listed above.

You may enquire from ALPHA other forms of conference bridge facilities where participants can dial into a toll free number and carry out a conference without the possibility of any participant falling out of the conference.

There is no subscription required for setup of this service. Also the conference can be recorded.
